

Begay B., Fitzgerald S., Strimbu B.M., 2026. Impact of forest management activities on forest aesthetics using photogrammetric point cloud. *Ann. For. Res.* 69(1): 183-204.

Table 5 Stand A Visual Impact metrics categorized by pattern number and viewpoints. Five viewpoints delineated in the various management patterns in highly visible locations were chosen. Total Visible area is shown in the pixels column, with each pixel spatial size recorded in meters. Critical Area High (CAH) and Critical Area Low (CAL) refer to the special designation areas in meters where roads outside the McDonald Dunn Research Forest and CAL refer to roads inside the McDonald Dunn Research Forest.

Design	Viewpoint	Pixels (m)	CAH (m)	CAL (m)
